# brother fax 1030e manual

This machine has been designed to be simple to use, with LCD screen prompts to guide you through functions. However, you can use your machine to its fullest potential by taking a few minutes to read this manual. Userfriendly programming helps you take full advantage of all the functions your machine has to offer. See Using This Manual, page i. Because you do all your programming on the LCD, we created stepbystep onscreen prompts to help you program your machine. Your machine cannot scan anything closer than 4 mm from the edge of the paper. Do NOT pull the paper while copying is in progress. Choosing a Location Place your fax machine on a flat, stable surface, such as a desk. Select a place that is free of vibration and shocks. Record four seconds of silence at the beginning of your message. This allows your machine time to listen for the fax CNG tones of automatic transmissions before they stop. Try to record the shortest possible message on your telephone answering device ideally less than 20 seconds. However, you can also connect a separate telephone to your machine, as shown below. Example for Australia Whenever this external phone or TAD is in use, the screen displays EXT. TEL IN USE, and, if the fax handset is lifted, an alarm sounds. Also inserts a pause in autodial numbers. One Touch Dial Keys These 6 keys give you access to 12 previously stored phone numbers. Press to scroll forward or backward to set a menu selection. You can also use these keys to do an alphabetical search for the names of stored numbers. Also, notifies you that you have voice or fax messages in the memory. Shift This key is used to access the "7" through "12" One Touch numbers. Also inserts a pause in autodial numbers. Also, access the Reports menu so you can select a report to print HELP LIST, QUICKDIAL, JOURNAL, TRANSMISSION, TEL.INDEX, SYSTEM SETUP and MEMORY STATUS List.If you are using a PULSE dial line, you can change the setting to PULSE by following the steps below.<http://elandinvestments.com/userfiles/cyber-crime-manual.xml>

The name and fax number will be printed on the fax cover pages and all fax pages that you send. The telephone number will be printed only on your cover pages and on the call back messages. See Electronic Cover Page, page 33 and Call Reservation, page 36. It is important that you enter the fax and telephone numbers in the internationally standardised. The machine comes set to LOW. When the beeper is set to LOW or HIGH, the machine beeps every time you press a key or make an error, and at the end of sending or receiving a fax. You can also store names with these numbers. There are 100 Speed Dial locations. Even if you lose electrical power, numbers stored in memory will not be lost.Leave appropriate unassigned numbers of onetouch dial buttons for Groups. Use LIGHT to send a light document. Use DARK to send a dark document. After sending the document the contrast setting is set to AUTO suitable for most documents automatically. IMPORTANT Do not pick up the handset—OR—Press Speaker phone for FAX1030e only. Insert the document face down in the Automatic Document Feeder. Enter the fax number you want to call. Press Fax Start. You must answer all calls yourself. If you hear fax tones, wait until the machine takes over the call automatically, then hang up see Fax Detect function. The screen displays your current selection. The options on FAX1020e are The options on FAX1030e are Or, if TAD Mode is switched ON by pressing DIGITAL TAD button, it overrides your Answer Mode Setting, so the display shows Continue to press Receive Mode until your new selection appears. This ringing happens after the initial ringing from the phone company. Only the fax machine rings for 20, 30, 40 or 70 seconds 20, 30, 40 or 55

seconds for New Zealand;. It is only to help the caller understand the status of your machine. For example, you can leave a message that says "Hello, please wait, we are trying to connect you."

If you wish to send a fax, please wait until you hear a fax tone and press the Start key, or, press remote activation code and press the Start key.". Choose 100% if you don't want a reduction. Remember, your machine cannot scan anything closer than 4 mm from the edge of the paper. Making a Single Copy Insert the document face down in the Automatic Document Feeder. To reduce to the size of A4 recording paper automatically, select AUTO. To select a reduction ratio, choose 93%, 87%, 75% or 50%. To enlarge a document, select 150%, 125% or 120%. To print a document at its original size, select 100%. You can use the handset or if you have FAX1030e you can use the Speakerphone to make and receive calls. This report lists the name or fax number of the receiving party, the time and date of transmission, and if the transmission was successful. For example, press 6 to print the SYSTEM SETUP. Your cover page includes the name stored in the One Touch or Speed Dial memory, if you have used this feature to start the call. The cover page indicates the fax is from your Station ID, and the number of pages you are sending. You can set the machine to send a cover page whenever you send a fax. The number of pages in your fax is not included when you use this setting. The other fax machine will ring as if it were receiving a telephone call; if the other party picks up the handset, your machine will ring. Insert the document face down in the Automatic Document Feeder. If no job is waiting, the screen displays NO JOB WAITING. You must then start from Step 1 to switch OFF Memory Security. If you forget the Memory Security password, please contact your Brother dealer for service or the help number given with the warranty documentation. This could be useful if you are sending a fax with photos and letters, or some pages with small print and others with normal print. An extension phone is another phone on the same phone number as the machine, but plugged into a different telephone wall socket.

Set the fax machine to Manual mode. Press to select ON or OFF. The Caller ID information stored in the memory can be used for the following. This way, when you get an incoming call, you can identify the number being called by its ring. How to Turn FaxAbility OFF or ON The FaxAbility function is designed to accommodate the FaxAbility service provided by Telecom. To change the setting, repeat Steps 13;. It is a fast way to screen your calls. You can respond quickly to calls you missed, because Caller IDs are received and stored in your machine's memory. Each phone number has its own Distinctive Ringing pattern, so you'll know which phone number is ringing. You can scroll through Caller ID information to review those calls made to your machine. You can use your machine to "poll" other machines, or you can have someone poll your machine. All parties involved in polling need to set up their machines to accommodate polling. When someone polls your machine to receive a fax, they pay for the call;. The screen prompts you to enter the time you want to begin polling. Enter the time in 24hour format you want to begin polling. If nothing is waiting, the screen displays NO JOB WAITING. You can use Secure Polling only with another Brother fax machine. Your fourdigit ID number must be entered on the fax machine that polls for your documents. If you have model FAX1030e your remote fax options are handled by the Message Centre. See Message Centre Only for FAX1030e, page 63. Setting Fax Storage If you set Fax Storage to ON, you will be able to retrieve fax messages from another location, using Fax Forwarding or Remote Retrieval functions. To receive faxes or the Memory Status List at your location, you must call from a fax machine using touch tone. When you call the fax machine and enter your Remote Access Code 1 5 9 remote control command. Lift the two release levers to release the white roller. Pull the document toward the front of the machine. Lock the two release levers back in place. Be careful not to cut yourself on the sharp edges of the metal part shown in the illustration. Pull the jammed paper toward the back from the paper tray and remove it as per diagram A. If you can't, pull the jammed paper toward the front and remove it as per diagram B. You can make a copy using the Copy function and see if the same problem occurs. If the copy is also bad, call your Brother dealer for service. If the copy shows the same Sending problem, the scanner area is dirty. Lift the front cover and check the document path. Clean the scanner's white roller and the glass strip under the roller using isopropyl alcohol and a lintfree cloth. Open the front cover. Clean the white roller and the glass strip under the roller with isopropyl alcohol on a lintfree cloth. You will need to lift the two release levers to release the white roller; be sure to lock them in place when you are through. To clean the machine's thermal print head, wipe the metal and plastic part with a lintfree cloth that is dry or lightly moistened with isopropyl alcohol. Wait until the alcohol on the metal and plastic part is totally dried. Install the printing cartridge. Be careful not to cut yourself on the sharp edges of the metal part shown in the illustration. Take out the used print cartridge. Remove the stopper from the new printing cartridge. White shaft Blue shaft Chapter 13. Install the printing cartridge by inserting the recessed four holders. Recessed Press down on both sides of the top cover to close it securely. If you are returning the fax machine to Brother as part of the Brother Exchange Service, pack only the fax machine. Keep all separate parts to use with your "Exchange". Save them for later reference. Follow all warnings and instructions marked on the product.
